

Next-Gen Hyperautomated Telecom Expense Management

Understand your **Telecom Expenses** by utilizing Asignet's proprietary software platform and hyperautomation for data collection from invoices, inventory, call detail records, bandwidth, usage, and contracts without using EDI.

Asignet's hyperautomated platform and process automation answers the following questions.

1. How do you know what you are paying for is correct?
2. How do you validate invoices?
3. How do you build an accurate inventory?
4. How do you ensure invoice cost equals your contracted rates?
5. How are you securing vendor portals?
6. How can you ensure you never miss an invoice from any global vendor?
7. How do you ensure you are paying the correct taxes globally?
8. How are you tracking audit and dispute claims?
9. How are you managing the provisioning and de-provisioning
10. How are you managing the quoting process?

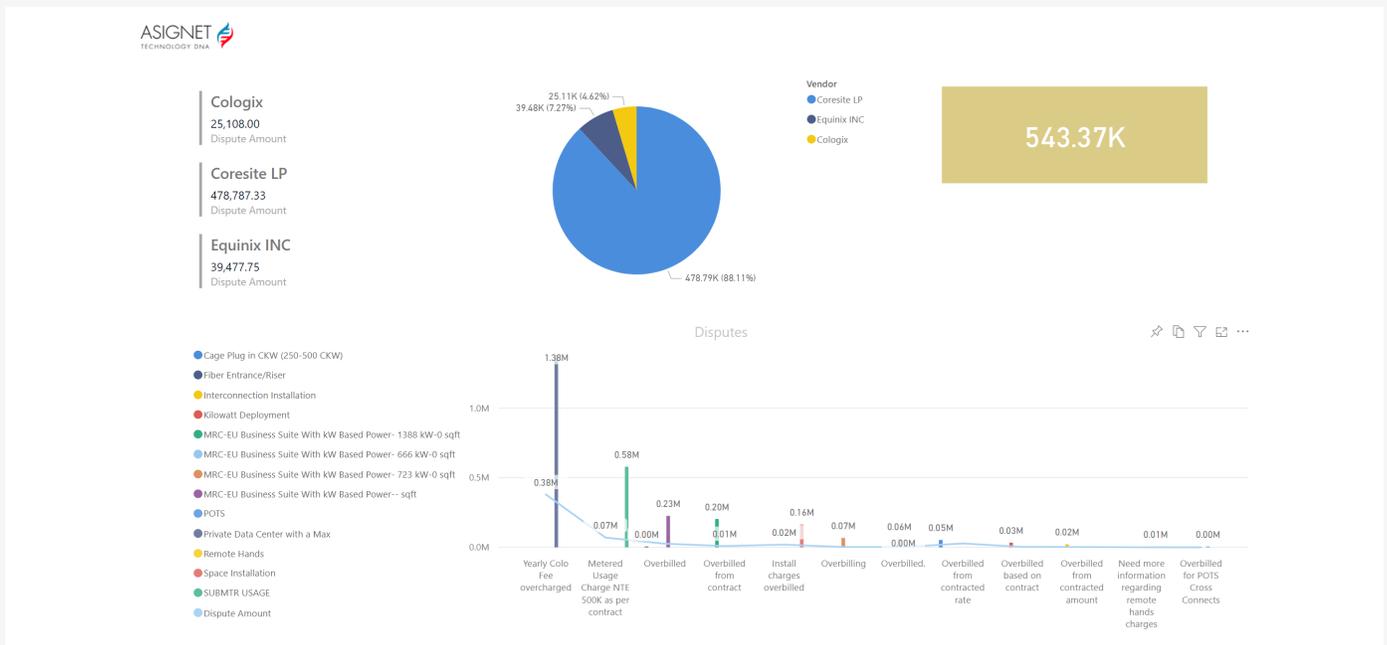

How does it work?

It works by using an RPA driven TEM platform integrated into a fully managed service.

The Future of TEM (True CMBD Inventory):

Asignet's patented solution is able to discover and build the true CMBD of your telecom infrastructure, each component of

your voice, data, and mobile network ensuring that the services being paid for are actually there, working, contracted and configured correctly.

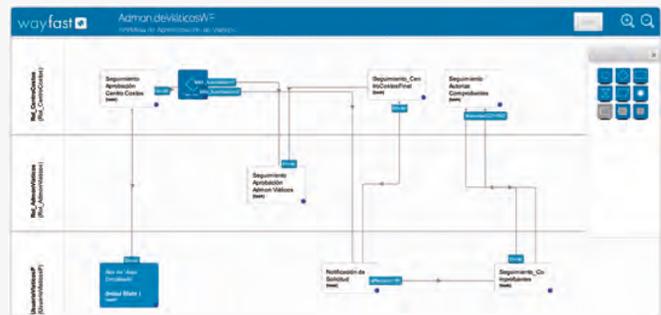

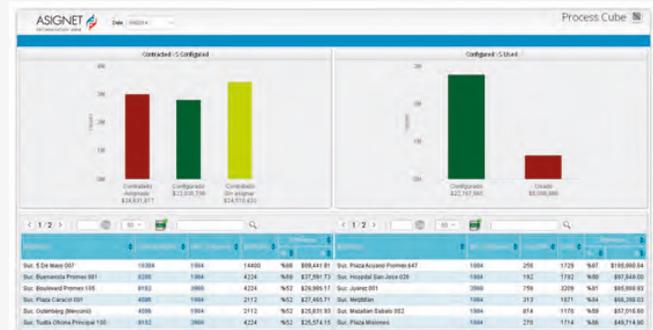

The Future of Contract Management:

Asignet's next-generation contract management allows for the automation and break down of all contract terms and billing components. Utilizing both Hyper Automation and AI to match billing elements to all contract terms and commitments.

The Future of Business Process Automation through our 100% customizable provisioning workflows:

Translating business processes to standard workflows is carried out with greater speed. This hyperautomated process allows traceability, scalability, and accountability; providing real-time information as well as significant savings.

Benefits

- 1 Reduction of IT & telecom expenses.
- 2 Gain employee productivity and efficiency.
- 3 Ensure 100% IT & telecom contract compliance.
- 4 100% accurate asset inventory.
- 5 Create a single system of record for IT & Telecom (CMBD).
- 6 Streamline existing IT & Telecom business processes through our workflow engine.

- 7** Optimize your existing IT & telecom investment.
- 8** Gain labor efficiencies.
- 9** Eliminate operational risk by stopping uncontrolled access to corporate systems.
- 10** Implement and manage your entire mobile strategy within a single system.
- 11** Realize 100% of your VoIP investment through our patented intelligent routing solution.
- 12** Realize indirect savings.
